

## **Important Information about Event Entries in the Future**

Within in the next few months Motorsport New Zealand will be launching the upgrade to the online motorsport system "Possum". What will this mean for you?

**All events will be entered online, prior to the day** this will speed up the documentation process, as you will only have to present your licences and sign a sheet, as the system will have already checked that they are valid. Your up to date car details will also be in the system so it will print out a scrutineering list, as to who is due to be scrutineered as the system will be updated following each event.

It will still be possible to enter on the day, however this will create more work for the event secretary who will then need to log your entry online at the end of the day. It therefore will be preferred that you have entered online prior to the day. Some clubs are considering an extra charge for on the day entries!

**So what do you need to do? Make sure you are registered on the online motorsport possum system, and you know your password etc.**

**[possum.motorsport.org.nz](http://possum.motorsport.org.nz)**

Motorsport NZ will send out instructions prior to the online entry system going live.

There will be many other things the upgrade will allow you to do including, being able to renew and apply for log books, authority cards etc online.

You will be able to search through all events Nationwide and register your interest prior to the date the online entries open, the system will then automatically send your details to the organising club.

This will obviously be a huge change and will take some time to get used too, but once up and running it will be a benefit to the event organising clubs and will speed up the process on the day at events, so you will be able to arrive at the event and have more time to prepare yourself and your car.

Once the system is live if anyone has any questions contact the club event secretary.
